1. Executive summary of client requirements

Trusted Vision Company is pleased to offer consulting services for the implementation and acquisition of ISO 27001:2022 certification.

Our We believe that our extensive experience in conducting similar cybersecurity projects positions us among the elite consulting firms. This is further supported by our:

- Balanced blend of international and local expertise in cybersecurity.
- Efficient project execution approach, ensuring timely, professional, and high-quality outcomes.
- Comprehensive knowledge and experience in designing and implementing solutions aligned with international standards and best practices.
- Best consulting expertise to enhance cybersecurity.

2. Project Benefits and Values

By implementing this project, the expected benefits and values will be the following.

1. Improve the cybersecurity system within the entity
2. Increase competitive advantage by ensuring the safety, security, value and availability of data to support business decisions.
3. Achieve economy and efficiency by applying international controls and standards
4. Reduce risks and costs resulting from data breaches and cybersecurity risks.
5. Enhance transparency and accountability in cybersecurity management

Note: The cooperation of the entity and its employees is important, sensitive and necessary to ensure the success of this project.

Note: Some documents may be combined and delivered to one document as needed and according to the requirements and circumstances of the entity.

3. Project management and implementation methodology

We at Trusted Vision follow the global project management methodology of the Project Management Institute (PMI) in terms of initiating, planning, executing, monitoring, and controlling, and closing.

3.1 Initiating Phase

At this phase, the project is defined, and the project leader outlines their responsibilities, identifies key stakeholders, and conducts a status assessment. This assessment aims to develop a comprehensive understanding of the entity's cybersecurity system, its compliance posture, and the associated cyber risks.

The table below lists the activities that will be carried out during this phase:

#	Activities that must be conducted by the trusted vision company	Activities that must be conducted by the entity	Activities completed and materials delivered to the entity
1	Preparing the project team	Assigning a project manager from the entity to work with the consultants	A team prepared to start the project
2	Preparing to start the project and holding the kickoff meeting	Inviting the head of the entity and all department heads	Meeting minutes

#	Activities that must be conducted by the trusted vision company	Activities that must be conducted by the entity	Activities completed and materials delivered to the entity
3	Develop Project Plan	Review and approve the project plan	Project Plan

3.2 Planning Phase

At this phase, various activities will be undertaken, including conducting a status assessment to gain a comprehensive understanding of the entity's cybersecurity framework, collecting all relevant documents available within the entity, evaluating its compliance posture, and identifying associated cyber risks.

The table below contains the activities that will be carried out at this phase:

#	Activities that must be conducted by the trusted vision company	Activities that must be conducted by the entity	Activities completed and materials delivered to the entity
1	Collect evidence and information related to cybersecurity requirements, including current cybersecurity governance documents: • Policies • Procedures • Cybersecurity Strategy, Digital Transformation, Data Management and IT • Frameworks • Technical Standards • Information and Technology Asset Register	Submitting the required documents	Meeting minutes
2	Conducting interviews with departments and stakeholders, including but not limited to: 1. General Department of Cybersecurity 2. General Department of Information Technology 3. General Department of Digital Transformation 4. Facilities Department 5. Administrative Affairs Department	1. Coordinate interview appointments 2. Submit required documents	Meeting minutes

3.3 Executing Phase

At this phase, the project is implemented according to the plan set to obtain the expected outputs.

The table below contains the activities that will be carried out at this phase:

ISO 27001:2022 and SOC2 TYPE 2 Implementation (TSC + CIA Part)

#	Activities that must be conducted by the trusted vision company	Activities that must be conducted by the entity	Activities completed and materials delivered to the entity
1	Develop documents related to the cybersecurity system (policies, standards, procedures, and measurement indicators), including but not limited to: • Cybersecurity Oversight Committee Charter. • Acceptable Use. • Malware Protection. • ISMS Strategy • Third-party Security Management. • Cybersecurity Logs and Incident Management and Monitoring. • Physical Security. • Cybersecurity Business Continuity. • Information Asset Management. • Data Classification and Protection. • Mobile and Personal Device Security Management. • Network and Communications Security. • Secure Development of Applications and Systems. • Identity Management and Access Control. • Encryption and Key Management. • Backup Management. • Cybersecurity Risk Management.	Review and approval of documents	Documents related to the cybersecurity system

#	Activities that must be conducted by the trusted vision company	Activities that must be conducted by the entity	Activities completed and materials delivered to the entity
	• Technical Vulnerability Management Standards. • Cybersecurity Compliance Management Standards. • Cybersecurity Internal Audit Management Standards. • Cybersecurity Threat Management Standards. • A detailed program and plan for assessing internal compliance with policies and procedures (for at least one year). • A detailed program and plan for internal auditing (for at least one year). • Baseline's Configuration standards for technical assets • Risk Assessment Report • Risk Register & Risk Treatment Plan		

SOC2 TYPE 2 Implementation (Privacy Part)

#NO	Activities that must be conducted by the trusted vision company	Activities that must be conducted by the entity	Activities completed and materials delivered to the entity
1.	Develop a personal data protection plan that meets the operational and strategic requirements of personal data protection by the Personal Data Protection Policy issued by the National Data Management Office.	Review and approve a personal data protection plan.	A personal data protection plan.
2.	Developing a Record of Processing Activities (ROPA).	Review and approve the Record of Processing Activities (ROPA).	Record of Processing Activities (ROPA).
3.	Website Privacy Policy and Cookie Policy.	Review and approve the Website Privacy Policy and Cookie Policy.	Website Privacy Policy and Cookie Policy

#NO	Activities that must be conducted by the trusted vision company	Activities that must be conducted by the entity	Activities completed and materials delivered to the entity
4.	Data Protection and Privacy Policy (Handling Personal Data and Compliance with PDPL Principles including Privacy by design and default and data minimization guidelines).	Review and approve the Data Protection and Privacy Policy.	Data Protection and Privacy Policy.
5.	Personal Data Breach Notification Template	Review and approve the personal data breach notification template	Personal Data Breach Notification Template
6.	Development of Personal Data Protection Training Plan	Review the personal data protection training plan.	Personal Data Protection Training Plan

#NO	Activities that must be conducted by the trusted vision company	Activities that must be conducted by the entity	Activities completed and materials delivered to the entity
7.	- Document of Roles and Responsibilities Related to Personal Data Protection - Target Operating Model (TOM)	Review and approve the document outlining roles and responsibilities related to personal data protection.	Document of Roles and Responsibilities Related to Personal Data Protection
8.	Privacy Risk Assessment Policy and Procedures - DPIA	Implementing the Privacy Risk Assessment Policy and Procedures.	Privacy Risk Assessment Policy and Procedures - DPIA
9.	(DPIA) Impact Assessment Template	Review and approve the Data Protection Impact Assessment (DPIA) template.	(DPIA) Impact Assessment Template
10.	Reporting and Approval Policy and Procedures	Implementing policies and procedures for managing consents.	Reporting and Approval Policy and Procedures

#NO	Activities that must be conducted by the trusted vision company	Activities that must be conducted by the entity	Activities completed and materials delivered to the entity
11.	Consent Collection Template	Review and approve the consent collection template.	Consent Collection Template
12.	Data Subject Rights Management Procedures (Procedures for Handling Data Subject Requests include Access, Correction, Erasure, and Restriction of Processing Requests	Implementing procedures and plans for managing data subject rights.	Data Subject Rights Management Document.
13.	Record of Personal Data Subject Requests	Review and approve the record of data subject requests.	Record of Personal Data Subject Requests
14.	Data Subject Requests Template	Review and approve the data subject request template.	Data Subject Requests Template

#NO	Activities that must be conducted by the trusted vision company	Activities that must be conducted by the entity	Activities completed and materials delivered to the entity
15.	Data Sharing Policy and Procedure	Review and approve the data sharing policy and procedures.	Data Sharing Policy and Procedure
16.	Data Processing and Sharing Agreement for supplier contracts (Controller-to-Controller and Controller-to-Processor)	Review and approve the data processing and sharing agreement.	Data Processing and Sharing Agreement
17.	Third-Party Compliance Assessment Template	Review and approve the third-party compliance assessment template.	Third-Party Compliance Assessment Template
18.	Record of Disclosure and Sharing Activities Documentation	Review and approve the record of disclosure and sharing activities documentation.	Record of Disclosure and Sharing Activities Documentation

#NO	Activities that must be conducted by the trusted vision company	Activities that must be conducted by the entity	Activities completed and materials delivered to the entity
19.	Internal Disclosure/Sharing Cases Assessment	Review and approve the assessment of internal disclosure/sharing cases.	Internal Disclosure/Sharing Cases Assessment
20.	Data Sharing Template and Attachment on the Website.	Review and approve the data sharing template and its attachment on the website.	Data Sharing Template and Attachment on the Website.
21.	Process for Managing Data Breach Handling.	Review and approve the process for managing data breach handling.	Document for Managing the Data Breach Handling Process.
22.	Data Breach Notification Template.	Review and approve the Data Breach Notification Template.	Data Breach Notification Template
23.	Retention and Disposal Policy and Procedures.	Review and approve the Access Storage and Disposal Policy and Procedures.	Access Disposal Policy and Procedures.

#NO	Activities that must be conducted by the trusted vision company	Activities that must be conducted by the entity	Activities completed and materials delivered to the entity
24.	Internal compliance monitoring report.	Review and approve the internal compliance monitoring report.	Internal compliance monitoring report.
25.	Consolidated Record of Compliance Audit Logs.	Review and approve the compliance audit logs.	Compliance audit logs.
26.	Preparing educational awareness materials on how to protect personal data. (including PDPL principles, data protection responsibilities, and regulatory requirements)	Coordination with all departments and divisions.	Awareness Tests and Understanding Assessment Presentations
27.	Implementation plan for the personal data protection law and regulation.	Review and approve the implementation plan.	Implementation plan for the personal data protection system and regulation.

#NO	Activities that must be conducted by the trusted vision company	Activities that must be conducted by the entity	Activities completed and materials delivered to the entity
28.	Dashboard for Displaying Data and Information in Graphical Interfaces.	Review and approval.	Dashboard

3.4 Monitoring and Controlling phase

At this phase, project work is monitored, performance and changes are tracked, and all project deliverables are verified. The project objectives are achieved, and final approval of the deliverables is obtained.

The table below also contains the activities that will be carried out at this phase:

#	Activities that must be conducted by the trusted vision company	Activities that must be conducted by the entity	Activities completed and materials delivered to the entity
1	Conduct Cybersecurity awareness workshops for all company employees	Coordinate meeting with stakeholders	Awareness workshop materials

#	Activities that must be conducted by the trusted vision company	Activities that must be conducted by the entity	Activities completed and materials delivered to the entity
2	Supervise the ISO 27001:2022 implementation	-	Meeting minutes
3	Provide a Bi-Weekly email on the progress	-	Project progress
4	Support preparation for Management Review (objectives status, risks, non-conformities, corrective actions, improvement opportunities)	-	Meeting minutes
5	Conduct Internal Audit for ISO 27001:2022	Collaboration with the internal auditor	Internal audit report
6	Receive all project data	Approve all the documents	Receive all project data

3.5 Closing phase

At this phase, the external auditor will conduct the audit to ensure compliance and obtain the ISO 27001:2022 certification for the entity. Once the certification is secured, the project closure report is signed, and the project is officially closed.

The table below contains the activities that will be carried out at this phase:

#	Activities that must be conducted by the trusted vision company	Activities that must be conducted by the entity	Activities completed and materials delivered to the entity
1	External Audit of ISO 27001:2022	Cooperation with the external auditor	Audit report with certificate. Note: The external auditor may refuse to grant the ISO

#	Activities that must be conducted by the trusted vision company	Activities that must be conducted by the entity	Activities completed and materials delivered to the entity
			27001:2022 certificate due to the lack of evidence of support and operation of the information security system
2	Project sign-off	Sign off by the company's Management	Project closure report

4. Knowledge Transfer

Knowledge transfer includes transferring knowledge from the consultant to the entity's employees and training with the aim of carrying out the work that the consultants were doing and enabling the Authority's employees to be able to carry out all the consultants' work with confidence and competence. Knowledge will be transferred to the entity's employees through the following schedule:

How (communication channels)	From (target management)	when	what (content)
• Video meetings • In-person meetings • E-mail	Cybersecurity (if applicable) or relevant department	Daily	All documents and plans related to the project

5. Weekly Project Progress Report

The table below shows the project progress on a weekly basis to ensure that the objectives are met according to the planned schedule. The report is divided into four main sections:

1. Current Week Achievements: Includes all activities and tasks completed during the week.
2. Next Week Achievements: Identify the tasks and activities planned to be implemented to ensure continuity.
3. Challenges: Review obstacles that may affect the workflow, identifying areas that need solutions.
4. Recommendations: Provide suggestions to improve performance, reduce potential challenges, and ensure operational efficiency.

Project Name		xx	
Project Manager (x)		xx	Project Manager (Trusted Vision) xx
Achievements for the past week (18-08-2024 To 22-08-2024)	1		
	2		
	3		
To be achieved next week (25-08-2024 To 29-08-2024)	1		
	2		
	3		
Challenges and outstanding issues	1		
Recommendations	1		
	2		

6. Resource, Quality and Communication Plans

In the initiating phase, the project manager makes a set of plans to implement the project in the best possible way, including a resource plan, a quality plan, and a communication plan, as follows:

1. In the resource plan, the available resources are identified, requirements are determined, priorities are determined, and resources are distributed according to priorities.
2. In the quality plan, quality standards are determined for application in the project, such as workflow methods, time required to review documents, and mechanisms for reviewing and approving documents.
3. In the communication plan, the best methods of communication are determined according to the needs of stakeholders, and the plan is written down and implemented

The plans are an important part of project management, and their purpose is to determine how to prepare resources, manage quality, and how to communicate during the life of the project. They include all the roles of stakeholders.

7. Risk Register

The most important risks related to the project and the controls for dealing with them have been identified as in the table below

Danger number	Risk scenario	Total level	Controls for dealing with risk
1	Lack of cooperation from the entity's employees, resulting in a delay in deliveries	high	1. Allocating a person from the entity and assigning him to work with the consultants 2. Giving a message and order from the authorized person to all departments regarding the necessity of cooperating with the consultants to ensure the completion of the project within the specified time
2	The entity is not satisfied with the documents delivered	middle	Developing a quality plan and activating it between the company and the entity
3	One of the consultants resigned during the project work	low	Providing other consultants as backup by the company

8. Project Scope and Assumptions

Out of Scope of Work

1. Implementing or purchasing technical tools and solutions related to the implementation of the ISO 2701:2022
2. Any other service not clearly mentioned in the previous sections will be considered outside the scope of work.

Assumptions

1. All activities will take place during the project period only and the company has no relationship if there is any delay or lack of cooperation from the entity.
2. The company is not responsible for any delay caused by the entity.
3. Cooperation from the entity's departments and departments is mandatory for the success of the project.
4. Delivered documents will be reviewed for 3 days only.
5. This project will be implemented within 6 months.
6. After the project, we will be with you during the audit phase to maintain the ISO 27001 certificate
7. An AI bot will be integrated to record and summarize conversations, aiming to assist consultants in improving and enhancing meeting minutes.
8. The company has the right to temporarily suspend the project if the payment is not made within two weeks from the date of issuing and sending the invoice to the entity.

9. Company Information

Trusted Vision is a cybersecurity and data management consulting firm that provides full services in governance, risk, and compliance management, as well as solutions and training, to help entities meet their business requirements.

10. Certificates

Our team holds a variety of certifications, including:

11. Previous Projects

Many projects have been implemented by dealing with various parties in different countries and multiple environments, and we always strive to implement the best practices and standards to achieve the best required results.

Project No.	Project Name	Client Name	Logo	Project Description
1	Implementation of the SAMA CSF Cybersecurity Framework	Gulf Union and Al Ahlia Insurance Company		1. Developing cybersecurity policies, procedures and standards issued by the Saudi Central Bank 2. Conducting a Cybersecurity Risk Assessment on information systems, assets and processes 3. Developing key performance indicators and key risk indicators for operations (KPIs, KRIs) 4. Performing process monitoring
2	Implementing a Business Continuity Management System SAMA BCM	ASIG Insurance Company		1. Establish a Business Continuity Management System 2. Develop relevant policies, procedures and standards 3. Define and implement a Business Impact Analysis 4. Conduct a Business Continuity Risk Assessment 5. Define a Recovery Time Objective (RTO) and a Recovery Point Objective (RPO) 6. Developing a Business Continuity Strategy

				7. Develop Business Continuity Plans 8. Define Performance Metrics and KPIs
3	Implementation of Business Continuity and Disaster Recovery Program	Energy Manufacturing and Services Company (TAQA)		1. Establish a Business Continuity Management System 2. Develop relevant policies, procedures and standards 3. Define and implement a Business Impact Analysis 4. Conduct a Business Continuity Risk Assessment 5. Define a Recovery Time Objective (RTO) and a Recovery Point Objective (RPO) 6. Develop a Business Continuity Strategy 7. Develop Business Continuity Plans 8. Define Performance Metrics and KPIs
4	Implementation of ISO 27001 and basic cybersecurity controls (ECC, CCC, DCC, OSMACC, TCC)	Energy Manufacturing and Services Company (TAQA)		1. Establish a cybersecurity management system 2. Develop a cybersecurity strategy and operational model 3. Develop relevant policies, procedures and standards 4. Ensure compliance with the National Cybersecurity Authority frameworks ECC, CCC, DCC, OSMACC, TCC 5. Ensure compliance with ISO 27001

				6. Conduct internal audits on the National Cybersecurity Authority frameworks and ISO 27001 7. Obtain ISO 27001 certification
5	Audit and Oversee the Implementation of NCA-ECC Essential Cybersecurity Controls	Sovereign Government Entity		1. Improve governance documents (cybersecurity strategy, cybersecurity roles and responsibilities, cybersecurity policies) 2. Audit of core cybersecurity controls NCA-ECC
6	IT Systems Audit	Lebara Telecommunications Company		IT Policies and Procedures Audit (General Technical Controls + Application Technical Controls)
7	ISO 27001 Information Security Standard Training	Energy Manufacturing and Services Company (Energy)		Providing training in ISO 27001 information security standard
8	Data Management and Governance Strategy	King Abdulaziz Public Library		1. Conduct gap analysis on the national data governance and management framework 2. Study the current situation 3. Develop a data management strategy 4. Develop an open data plan 5. Publish six open data sets on the Saudi National Data Platform

9	Implementation of ISO 27001 Information Security Standard	Genelle		1. Establish an information security management system 2. Develop relevant policies, procedures and standards 3. Ensure compliance with ISO 27001 4. Conduct remediation activities and resolve findings 5. Obtain ISO 27001 certification
10	Saudi Aramco Cybersecurity Implementation	Maham		1. Implement Aramco Cybersecurity Standard SACS-002 2. Develop relevant policies, procedures and standards
11	Data Classification	Perfect Presentation		1. Collect and classify all data 2. Develop policies, procedures and standards related to data classification and protection
12	Implementation of ISO 27001 Information Security Standard and Basic Cybersecurity Controls (ECC, CCC, DCC, OSMACC, TCC)	National Community Development Program (Tanmia)		1. Establish a cybersecurity management system 2. Develop a cybersecurity strategy and operational model 3. Develop relevant policies, procedures and standards 4. Ensure compliance with the National Cybersecurity Authority frameworks ECC, CCC, DCC, OSMACC, TCC 5. Ensure compliance with ISO 27001

				6. Conduct internal audits on the National Cybersecurity Authority frameworks and ISO 27001 7. Obtain ISO 27001 certification
13	Cybersecurity Risk Management	Sovereign Government Entity		1. Develop a cybersecurity risk management methodology and align it with the overall risk management methodology 2. Conduct a cybersecurity risk assessment on information assets + third parties + material changes + technical projects + operations
14	NCA-ECC and CCC-P	Nashirnet		1. Establish a cybersecurity management system 2. Develop policies, procedures and standards for cloud computing controls and ECC + CCC core controls for service providers 3. Conduct cybersecurity risk assessments for projects and products 4. Conduct internal audits 5. Develop and measure performance indicators
15	Data Classification and Modeling	King Abdulaziz Public Library		1. Develop data log 2. Classify data 3. Develop data modeling plan and perform modeling for library systems

16	Implementation of the Personal Data Protection Regulation (PDPL)	Aljaber Finance		1. Limiting personal data and processing activities 2. Developing policies, standards and procedures related to data privacy 3. Developing consent management processes 4. Conducting audits of data processing activities 5. Conducting awareness workshops on personal data protection
17	Implementation of the Personal Data Protection Regulation (PDPL) Regulation	Hala Payment		1. Limiting personal data and processing activities 2. Developing policies, standards and procedures related to data privacy 3. Developing consent management processes 4. Conducting audits of data processing activities 5. Conducting awareness workshops on personal data protection
18	Implementation of the Personal Data Protection Regulation (PDPL) Regulation	Mrna Finance		1. Limiting personal data and processing activities 2. Developing policies, standards and procedures related to data privacy 3. Developing consent management processes 4. Conducting audits of data processing activities 5. Conducting awareness workshops on personal data protection
19	Implementation of SAMA CSF	Finzey		1. Conduct a comprehensive cybersecurity gap assessment.

			 فينزي للتمويل FinZev Finance	2. Develop policies, procedures, and standards in alignment with the Saudi Central Bank (SAMA) Cybersecurity Framework. 3. Perform cybersecurity risk assessments for all information assets. 4. Establish and check cybersecurity performance indicators (KPIs) 5. Development of a comprehensive Disaster Recovery (DR) Plan and Incident Response (IR) Plan

12. Staff

#	Name	Job Title	Education Level	Years of Experience	Experience
1	S.	Governance and Risk Management (GRC)	Bachelor of Computer Engineering	6 Years	1. Manage and conduct operational and operational reviews in compliance with Saudi Arabian Oil Company (SAS 002), ISO 27001, NCA-ECC and NIST SP 800-53 cybersecurity requirements. 2. Manage and develop customized cybersecurity governance policies and procedures in Arabic and English by ISO 27001, NIST, NCA and Saudi Arabian Oil Company Cybersecurity Standard. 3. Manage cybersecurity risks and conduct cybersecurity risk assessments and IT risk assessments by national and international standards.

					4. Implement and review the organization's Information Security Management System by ISO 27001 and the National Cybersecurity Authority (NCA-KSA) 5. Managing and implementing the organization's business continuity management system according to ISO 22301
2	B. A	Governance and Risk Management (GRC) Consultant	Master of Cyber security	2 Years	1. Manage and conduct operational and business reviews by Saudi Aramco Cybersecurity requirements (SACS-002) ISO 27001, NCA-ECC, and NIST SP 800-53. 2. Manage and develop cybersecurity governance policies and procedures in Arabic and English by ISO 27001, NIST, NCA, and Saudi Aramco Cybersecurity Standards.

					3. Manage cybersecurity risks and conduct cyber risk assessments and technology risk assessments against national and international standards. 4. Implement and audit the organization's Information Security Management System based on ISO 27001 and National Cybersecurity Authority (NCA-KSA). 5. Implement personal data protection law and regulations and conduct privacy risk assessments related to personal data.
3	G.H	Governance and Risk Management (GRC) Consultant	Bachelor of Computer Engineering	3 Years	1. Manage and conduct operational and process reviews by Saudi Aramco Cybersecurity requirements (SACS-002) ISO 27001, NCA-ECC, and NIST SP 800-53.

					2. Manage and develop cybersecurity governance policies and procedures in Arabic and English by ISO 27001, NIST, NCA, and Saudi Aramco Cybersecurity Standards. 3. Manage cybersecurity risks and conduct cyber risk assessments and technology risk assessments against national and international standards. 4. Implement and audit the company's cybersecurity management system based on ISO 27001 and National Cybersecurity Authority (NCA-KSA). 5. Implement personal data protection law and regulations and conduct privacy risk assessments related to personal data.
